

THE **BULLARD** HAY TEDDER
IMPROVED

MANUFACTURED
BY THE

BELCHER & TAYLOR AGL. TOOL CO.
CHICOPEE FALLS, MASS.

THE

Bullard Improved Hay Tedder

IS THE STANDARD.

WHY?

Because it does better and more work.

Because it draws easier, and has no side-draft.

Because it is the strongest made, and costs less for repairs.

Because it is the only Tedder built with forks outside, so that the wheels do not run over the spread grass.

Because it is the only Tedder that has proved satisfactory after years of service.

NOTE.—There are ten times as many in actual use as all other Tedders together.

THEY NEVER FAIL TO GIVE SATISFACTION.

 Send for descriptive Circular, giving testimonials, &c.
