**Wendell A. Mordy (1920-2002)**

**Papers, (1920-2004, undated)**

**Descriptive summary**

creator: Mordy, Wendell A. (1920-2002)  
title: Papers  
dates: 1920-2004, undated  
extent: 29.4 linear feet (21 records center cartons, 1 card file box, and 1 oversized box)  
collection number: MS 667  
repository: Special Collections Department, Iowa State University.

**Administrative information**

access: Open for research  
publication rights: Consult Head, Special Collections Department  
preferred citation: Wendell A. Mordy Papers, MS 667, Special Collections Department, Iowa State University Library.

## **Abstract**

Wendell A. Mordy was an educator, atmospheric physicist, and administrator. Mordy started his career as a meteorologist and soon became interested in research. He was named Meteorologist and Head of the Pineapple Research Institute and Experiment Station in Honolulu, Hawaii. He continued his career by accepting positions at the International Institute of Meteorology at the University of Stockholm, Sweden; the Desert Research Institute at the University of Nevada; and the Sea Grant Program at the University of Miami, Florida. Mordy served as President of the Center for the Future and also the Science Museum of Minnesota. As a researcher, Mordy was interested in meteorology and cloud physics. He published numerous papers and reports on meteorological phenomena and also wrote a nationally syndicated science column, "Science Today," for more than a decade. This collection contains biographical information, administrative records, correspondence, project records, published works, and writings of Wendell Mordy. The administrative records document Mordy's administration of several prominent research programs and institutes as well as the two centers he was most actively involved with, the Center for the Study of Democratic Institutions and the Center for the Future. The writings contain published reports and articles on climate change, cloud formation, weather studies, and other environmental concerns.

## **Biographical note**

Wendell Allen Mordy was born to James T. and Jane (Dalrymple) Mordy on April 28, 1920, in Rock Island, Illinois. He received his A.B. (1942) from Pomona College, California, his certificate in meteorology (1942) from the University of California, Los Angeles, and his Fil. lic. (Ph.D.) (1958) from the University of Stockholm, Sweden. Mordy was also awarded an Honorary Doctor of Science degree (1969) from William Jewell College.

Mordy had a long and distinguished career as a meteorologist, atmospheric scientist, and administrator. During the second World War, Mordy served as a Weather Officer (1942-1945) for the U.S. Air Force and received the Bronze Star. Following the war, Mordy worked as a meteorologist for United Airlines (1946), Pan American Airlines (1946-1947), and the U.S. Weather Bureau (1947-1948). He was then hired by the Hawaiian Sugar Planters' Association as Meteorologist and Head (1948-1956) of the Department of Meteorology at the Pineapple Research Institute and Experiment Station in Honolulu, Hawaii. While there, Mordy studied the islands' weather patterns, the chemical composition of rainwater, and the potential for cloud seeding.

In 1956, Mordy was offered the position of Research Meteorologist (1956-1960) at the International Institute of Meteorology located at the University of Stockholm in Sweden. Mordy investigated cloud condensate and cloud formation while in Sweden and also

earned his doctorate. He then served briefly as a Lecturer and Research Associate (1960) at the University of California, Los Angeles.

The University of Nevada hired Mordy in 1960 to organize and direct its newly established research division. Mordy was the Founding Director (1960-1969) of the University's Desert Research Institute and also served as the Edgar J. Marston Professor of Atmospheric Physics (1960-1969). In Nevada, Mordy continued his investigations into the physics of cloud formation and authored several reports on the subject. He also served as Vice Chancellor (1966-1969) for the University. During this time Mordy initiated the development of the Fleishmann Atmospherium Planetarium. Also during this period, Mordy began writing a nationally syndicated science column titled, "Science Today."

Mordy left the University of Nevada to pursue research opportunities at the University of Miami, Florida, where he was named Professor (1970-1972) of Atmospheric Sciences and Director (1970-1972) of the Sea Grant Program. Following that he was named a Visiting Fellow and Associate (1972-1977) at the Center for the Study of Democratic Institutions, an organization based out of Santa Barbara, California. Mordy also helped organize and was named President of the Center for the Future (1973-1988), an educational and research organization concerned with studying the social, economic, and political implications of technological change. He served as President (1977-1985) of the Science Museum of Minnesota. He retired in 1985.

Mordy was an active participant in numerous professional associations. As a member of both the American Meteorological Society and the American Geophysical Union he served on councils and committees related to cloud physics and popular education. He served as Chairman (1954-1956) of the Organizing Committee for the Hawaii Geophysical Institute. Mordy was also a delegate to the 7th (1949) and 8th (1953) Pacific Science Congresses.

Mordy married Brooke Davis on November 30, 1942. They raised two daughters, Lee Anne and Ruth Bright. Mordy passed away on July 14, 2002.

### **Collection description**

This collection (1920-2004, undated) contains biographical information, budgets, correspondence, lecture and class notes, research proposals and reports, and writings of Wendell Mordy. These materials document Mordy's career as a scientific researcher and administrator and reveal his interests in the environment, climate change, and meteorology.

The biographical materials include biographical sketches, correspondence, certificates and awards, curriculum vitae, diaries, membership information, and news clippings. Records related to Mordy's military service are also included.

Materials related to the Center for the Future include reports funded and published by the Center, materials on climate change and weather modification, budget information, correspondence, and interviews with researchers and staff. The Center was organized as an educational and research institute concerned with studying the social, economic, and political implications of technological change in society. The Center for the Study of Democratic Institutions was a scientific think tank founded by former University of Chicago President and Chancellor, Robert M. Hutchins. Materials in this collections related to this organization include papers, reports, and meeting minutes as well as materials detailing Mordy's affiliation with the Center.

A large part of the collection documents Mordy's professional career and his various research and administrative appointments. These materials include papers, budgets, correspondence, and research materials. The collection provides detailed information about the work Mordy performed at each place of employment including the Desert Research Institute (DRI) at the University of Nevada, the Pineapple Research Institute (PRI), the Sea Grant at the University of Miami, and the Science Museum of Minnesota.

Finally, the collection also contains a considerable amount of Mordy's professional writings. Most of his writings concern climate change, weather modification, science policy, and meteorological studies. Formats include scientific articles, newspaper columns, book chapters, published monographs, speeches, and conference proceedings. Additional writings can be found throughout the collection.

### **Related materials**

Related collections in the Special Collections Department, Iowa State University Library include:

- Lee Anne Willson Papers (RS 13/20/56)

### **Organization**

The collection is organized into five series:

[Series 1, Biographical Information, 1920-2004, undated \(chronological\)](#)

[Series 2, Center for the Future, 1970-1988, undated \(chronological\)](#)

[Series 3, Center for the Study of Democratic Institutions, 1960-1979, undated \(chronological\)](#)

[Series 4, Professional Career, 1949-1990, undated \(topical\)](#)

[Series 5, Professional Writings, 1951-1977, undated \(chronological\)](#)

**Description of series**

**Series 1      Biographical Information      1920-2004, undated**

extent:      1.3 linear feet (1 records center carton)

description: This series contains biographical information about Mordy. Materials include biographical sketches, correspondence, certificates and awards, curriculum vitae, diaries, membership information, and news clippings. Records related to Mordy's military service are also listed in this series. The series is organized chronologically.

### Description of series

**Series 2      Center for the Future      1970-1988, undated**

extent: 4.55 linear feet (3.5 records center cartons)

description: This series contains information on the Center for the Future including reports funded and published by the Center, materials on climate change and weather modification, budget information, correspondence, and interviews with researchers and staff. The Center was organized in 1973 by Mordy and several colleagues as an educational and research

institute concerned with studying the social, economic, and political implications of technological change in society. Mordy served as President and on the Board of Directors from the Center's inception until it was dissolved in 1988. The bulk of the records in this collection date from the 1970s. The series is organized chronologically.

### Description of series

**Series 3**      **Center for the Study of Democratic Institutions**      **1960-1979, undated**

extent:      9.1 linear feet (7 records center cartons)

description:      The Center for the Study of Democratic Institutions, located in Santa Barbara, California, was a scientific think tank founded by former University of Chicago President and Chancellor, Robert M. Hutchins. This series contains papers, reports, and meeting minutes from the

Center as well as materials detailing Mordy's affiliation with the Center. The series is arranged chronologically.

### Description of series

**Series 4 Professional Career 1949-1990, undated**

extent: 11.05 linear feet (8.5 records center cartons)

description: This series contains information, papers, budgets, correspondence, and research materials from throughout Mordy's professional career. The collection provides detailed documentation regarding Mordy's research and administrative responsibilities at each institution. The series is loosely grouped by place of employment consisting of the following: Desert Research Institute (DRI) and the University of Nevada; Photographs; Pineapple Research Institute (PRI); Professional (general); Research (general); Science Museum of Minnesota and

Retirement; Sea Grant and the University of Miami; and Universities (general). The series is listed chronologically within each grouping.
